

Weekly Report (2010-10-10)

Hongxing Li

During the past week, I am working on the following tasks:

- *EWSN'11 Paper*: I have revised the paper according to the advice from Prof. Lau and Dr. Wu, and submitted it.
- *CSIS9602*: I have finished the complete sample solution and marking scheme for assignment 1. Also, I am preparing the assignment 2, which should be released on 23rd, Oct. However, I will not be back to HK until 23rd Oct. Besides, I am not sure whether I can access the Internet everyday in Turkey. So, I am planning to complete the draft of assignment 2 before I leave.
- *Future work*: I am reading some papers, which are published recently, on network coding (theoretical analysis or design of physical network coding). I will keep on reading these papers during the trip to Turkey.
